

NORFOLK BAT SURVEY

Bat Monitoring Centre: NBIS, County Hall

TG3117

Summary: the numbers relate to the number of bat passes rather than necessarily the number of bats.

Bat species = where there is insufficient information to assign the recording to a species or bat family - normally where there is too much noise to pull out a reliable signal.

Myotis species = this is where the recording belongs to the family Myotis, which in Norfolk includes Natterer's, Daubenton's, Whiskered and Brandt's, but identification is not possible.

28 May

170 Bat species
98 Common pipistrelle
2 Myotis species
16 Nathusius pipistrelle
1 Noctule
1,014 Soprano pipistrelle

29 May

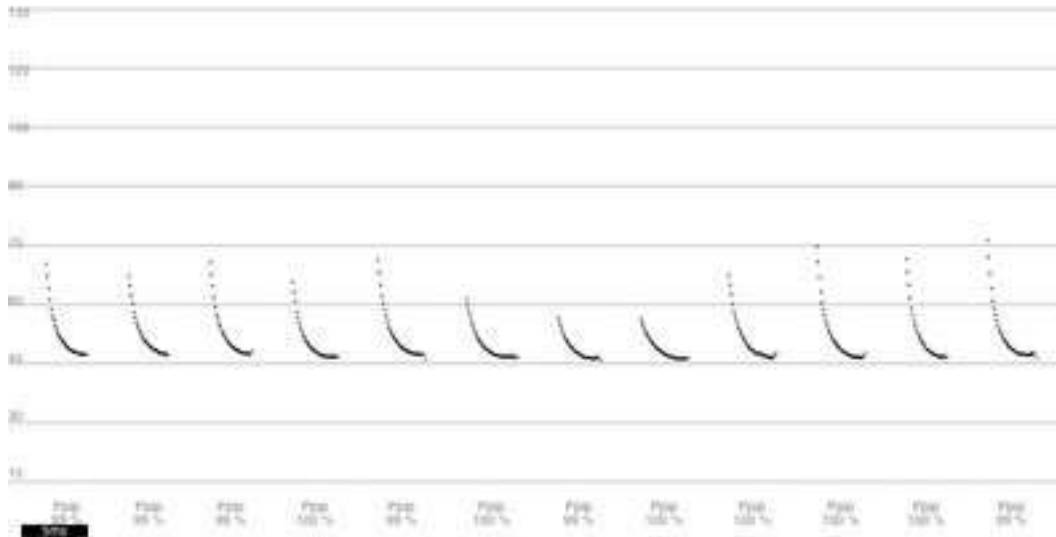

54 Bat species
49 Common pipistrelle
3 Daubenton's probable
7 Myotis species
1 Nathusius pipistrelle
486 Soprano pipistrelle

30 May

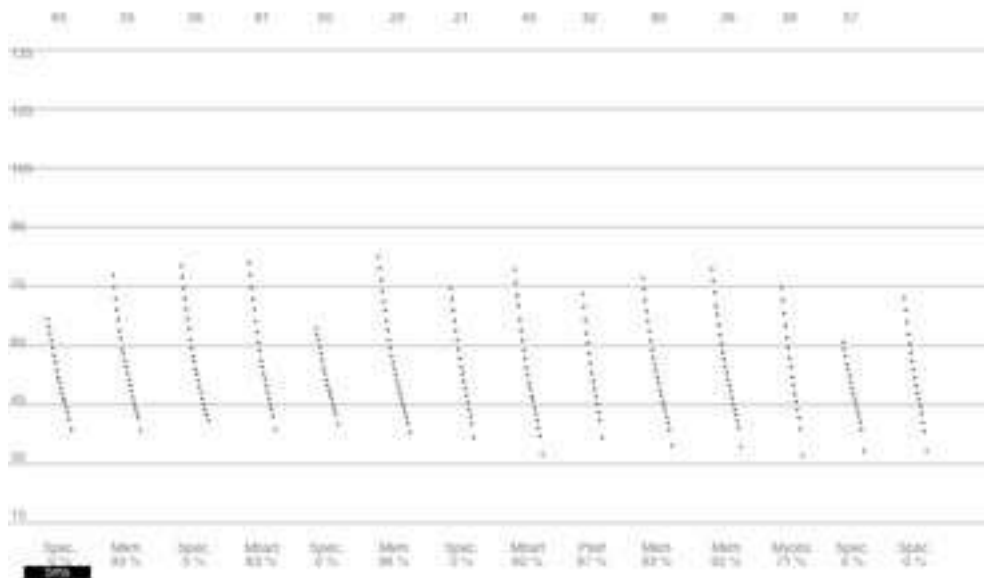

10 Bat species
5 Common pipistrelle
2 Noctule / Serotine or Leisler's
20 Soprano pipistrelle

Example species plots

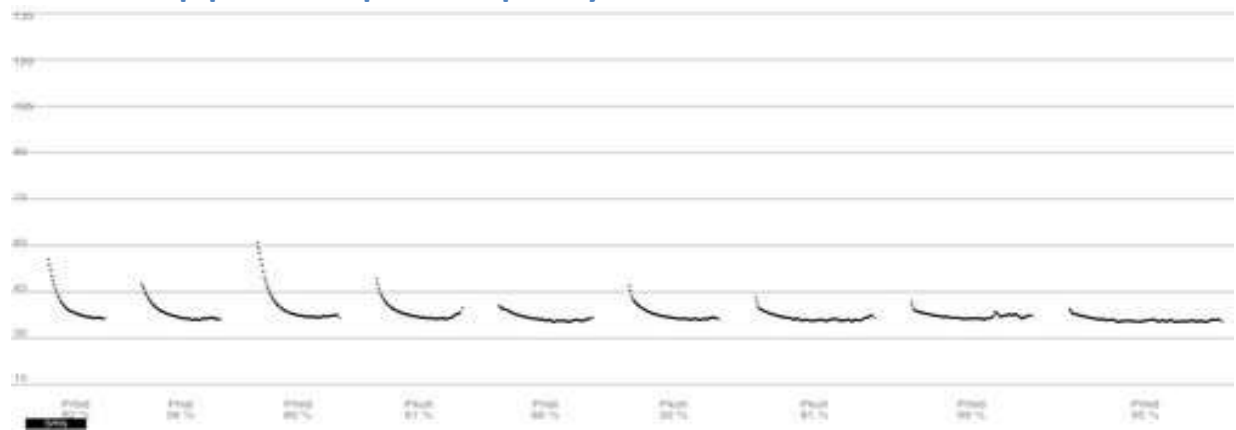

Common pipistrelle - peak frequency about 45 kHz

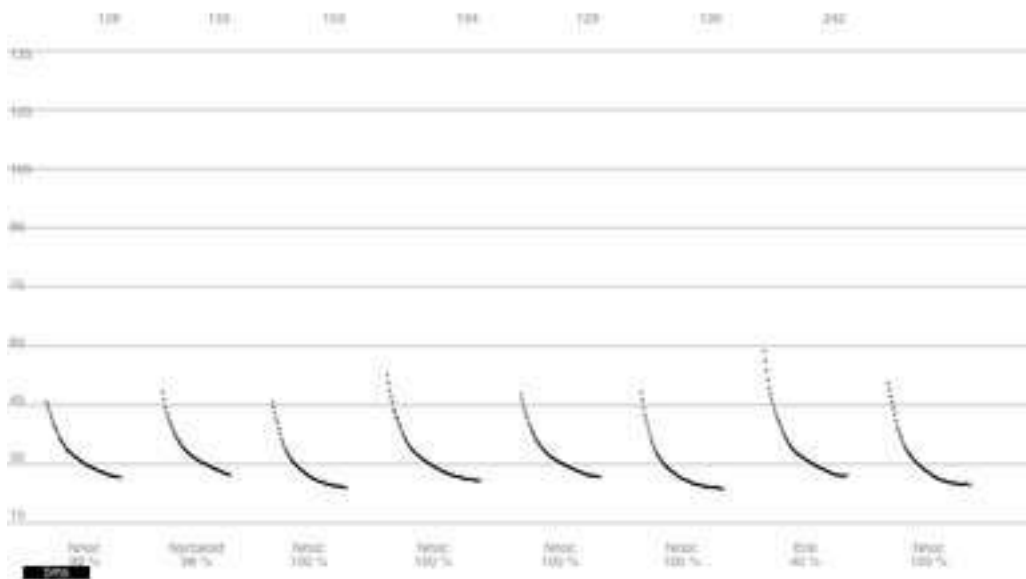

Myotis species - long sweeping calls (Daubenton's shown below)

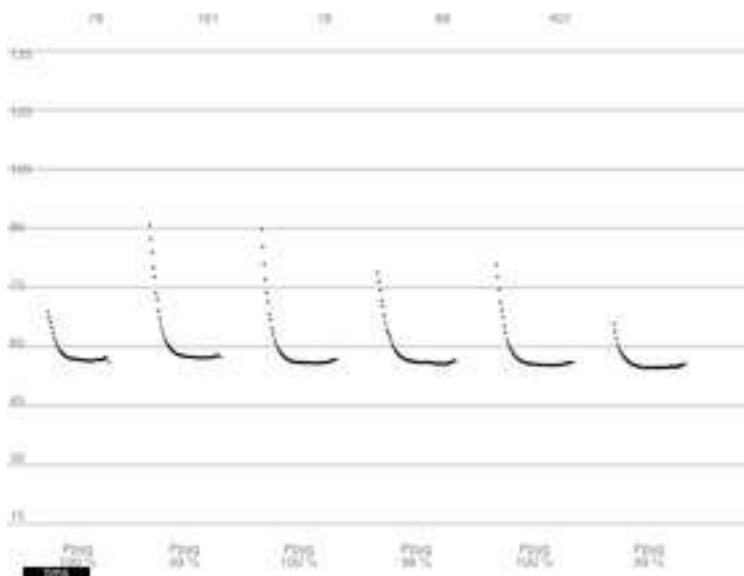

Nathusius' pipistrelle - peak frequency 36-38 kHz

Noctule - end frequency about 24 kHz

Soprano pipistrelle - peak frequency about 55 kHz
